

Good girls go to
Heaven...
Girls with a power drill
go everywhere!

WE CAN DO IT!

-- Girl Power Show --

"WE CAN DO IT!"

--- Girl Power Show ---

Ladies and Gentlemen,
Tonight you will have the honour of witnessing, right before your eyes, a simple object that... makes
the world go round!

And so, after countless mishaps, flying traffic cones, improbable road signs, juggling and unwilling
volunteers...

The mysterious object is finally revealed: the great **GERMAN WHEEL!**

"We Can Do It!" is a **comic and acrobatic street theatre show** dedicated to all working women,
which mixes a circus technique of great scenic effect combined with the fun of improvisation
with the audience.

Audience Target:

Suitable for all ages, 0-99, especially for a family audience.

Languages:

Speaking version: available in italian, english, french, portugues and spanish.
Wordless version **25 min.**

Artistic Project

"We Can Do It!" – Girl Power Show is a playful and empowering circus performance that challenges traditional gender stereotypes through physical comedy, ingenuity and extraordinary circus skills.

The show begins with a mysterious object hidden beneath a black cloth. What follows is an unexpected process of reconstruction: using her own skills, determination and a power drill, a female performer transforms the mysterious object into a German wheel.

--> Here we don't just talk about female empowerment: we bring it to life on stage.

The protagonist doesn't wait for someone to hand her a ready-made tool. She starts with a mysterious object and transforms it into something completely different.

This construction can become a metaphor for autonomy: refusing to passively accept what already exists and instead having the ability to reinvent it.

Techniques used in the Show:

Juggling, balancing, audience improvisation, fire juggling (optional), German Wheel.

TECHNICAL REQUIREMENTS

Scenic Space:

12 meters X 5 meters, FLAT and SMOOTH.

YES asfalt, marble, regular stones.

NO grass, cobbleston, gravel.

maximum slope : 3%

Minimum height: 5 m

→ Not sure if the location is suitable for the Show?

Send me some photos, I'll be happy to help you to find the best solution!

Preparation:

I kindly ask you to park the van as close as possible to the venue of the show to be able to unload the equipment.

If it is not possible to park near the area intended for the show (or in case of travel by plane) is required the presence of a backstage or a room to store the material.

Set up: 20 minutes

Taking apart: 15 minutes

Good to know:

I need at least 60 minutes from the end of a show to the beginning of the next.

If I need to change location, I kindly ask for the assistance of a Festival volunteer.

Audio*:

I have an autonomous audio system composed by two Bose S1 PRO
(we don't need to plug-in to the 220 V).

Lights*:

I have 2 Led's light (20 Watts each one).

If the location it's very dark, I could need a complementary light system.

*Audio system and Led Lights are not available in case of travel by plane.

In Case of Rain:

If it starts to rain lightly during the show, I can continue until the end.

But if the German Wheel gets too wet it becomes dangerous, because it becomes slippery.

So in case of excessive rain I may need to interrupt the show for my safety.

IMPORTANT: for the safety of the artists and the public

IF TECHNICAL REQUIREMENT CAN'T BE RESPECTED, THE SHOW WILL BE ADAPT TO THE REAL SITUATION.

For any questions, please contact me!
